1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshida (U.S. Patent No. 5,584,401). Yoshida '401 disclose a cassette 1 comprising frames 11,12, supporting bodies 2, and stopper rods 13. Yoshida '401 does not specifically state that the stopper rods 13 have been coated with a resin layer. However, Yoshida '401 does set forth that the supporting bodies 2 have been coated with a resin layer, wherein, to incorporate this teaching into other components of the cassette 1 for the explicit purpose of protecting the substrate from inadvertent damage would have been obvious to one of ordinary skill in the art.

2. The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Hayashida et al, Babbs et al, Williams et al, Shanahan, Payne et al.
